

NANOTEX® RESIST

Give your fabric powerful repellency performance with Nanotex Resist:

Nanotex Resist uses repellency technology that works at the molecular level of your fabric fibers using nano-scale “whiskers” to change the surface tension of fabrics **providing resistance against liquids and common spills.**

PROPERTIES:	FIBER TYPES:	APPLICATIONS:
Repels water based liquids and stains	Cotton	Activewear
Repels oil-based liquids and stains	Rayon	Apparel
Retains fabric softness	Polyester	Bedding
Outperforms conventional fabric treatments	Nylon	Linens
Breathable	Wool	Medical uniforms
PFAS free	Silk	Outerwear
	Acrylic	Tablecloths
	Polypropylene	Uniforms

TEST METHODS:	COMPATIBLE WITH:	CONTACT:
AATCC TM 22	 RELEASE	services.technical@nano-tex.com
AATCC TM 118	 WRINKLE DEFENSE	1.800.CRYPTON
AATCC TM 193	 FRESH PROTECT	nanotex.com
	 DURABLE WEAR	

We pioneered nanotechnology enhanced textiles.

Nanotex is the original and trusted source that transforms your fabric to better withstand the effects of nature and enhance your life.
