

NANOTEX® RESISTS STATIC

Give your fabric powerful repellency against static cling with Nanotex Resists Static:

Nanotex Resists Static uses repellency technology that works at the molecular level of your fabrics fibers using a sheath of positive and negative ions which **dissipate static charge**.

PROPERTIES:	FIBER TYPES:	APPLICATIONS:
Static resistance	Polyester	Apparel
Neutralizes charges to eliminate cling and shock	Nylon	Base layers
Retains fabric softness	Acrylic	Bedding
Durable	Polypropylene	Jacket linings
Breathable	Silk	Outerwear
PFAS free	Wool	Sleepwear

TEST METHODS:	COMPATIBLE WITH:	CONTACT:
AATCC TM 76	 ALL CONDITIONS	services.technical@nano-tex.com
	 RESIST	1.800.CRYPTON
	 COOLEST COMFORT	nanotex.com
	 AQUAPEL	

We pioneered nanotechnology enhanced textiles.

Nanotex is the original and trusted source that transforms your fabric to better withstand the effects of nature and enhance your life.
